GDOT
Georgia Department of Transportation

Interoffice Memo

DATE: March 12, 2019

FROM: Frank B. Flanders IV, P.E., Assistant State Design Policy Engineer

TO: Program Delivery, IPD, TIA, Engineering Services, and Divisions of Engineering, Operations, and Field Districts

SUBJECT: **GDOT Plan Sheets and the New GDOT Logo**

In keeping with the "Transition by Attrition" approach to the implementation of the Department's new logo, the Engineering Software Standards Group (ESSG) will not update the standard sheet cells for plans in MicroStation J and V8i to include the new logo. Instead, the standard sheet cells in the forthcoming OpenRoads Designer Connect Edition workspace will feature the new logo.

This will allow projects currently under design in the MicroStation v7/J and V8i workspaces to continue using the current drawing-number format and sheet-number format cells and will prevent the addition of a new logo version of each of those cells. This will also provide a cleanly defined break between the use of the new logo and the use of the old logo on plans.

The ESSG has updated the standard cell libraries for MicroStation J and V8i to include cells of the new logo for use on displays and other documents which need to match the branding for meetings and presentations. For internal users, the MicroStation V8i workspace has been updated to include the revised library; no further action is needed. External users will need to download the V8i CADD-All (revision date 1/30/2019) to get the updated library. Both internal and external users will need to download the GDOTCADD-AILL-V7addendum2 (revision date 1/30/2019) to update the MicroStation J workspace with the latest cell libraries.

If you have any questions about the standard sheet cells or the use of the new logo cells, feel free to contact Frank Flanders (fflanders@dot.ga.gov) at (404) 631-1978.
